# Avion Hidden Features

## Wall Construction

In line with traditional aircraft construction, Avion's inner aluminum wall and outer aluminum skin is supported by aluminum ribs and stringers. The Thermo-X™ insulation is foamed in place and creates uniform thermal and sound insulation throughout. New Dura-Brite® exterior offers easy maintenance and superior finish.

## Floor Construction

Floor construction assures the strength, durability, and convenience you expect from Avion. All water and plumbing lines are contained within the floor and protected by the full length all metal underbelly. Basement floor construction differs somewhat.

## AL-KO® Suspension

Tested on Europe's Auto Bahn, AL-KO® suspension provides incredibly smooth towing and handling — for your safety and protection of on-board personal goods.

**Fully independent suspension • Patented hexagonal design for maximum shock absorption • Safe, smooth, quiet ride • Maintenance free, no metal to metal contact • Faster, easier installation • Lower center of gravity, improved stability • Capacities from 500 to 7,000 pounds • Manufactured in U.S.A.**
